Technical drawings of various profile types:

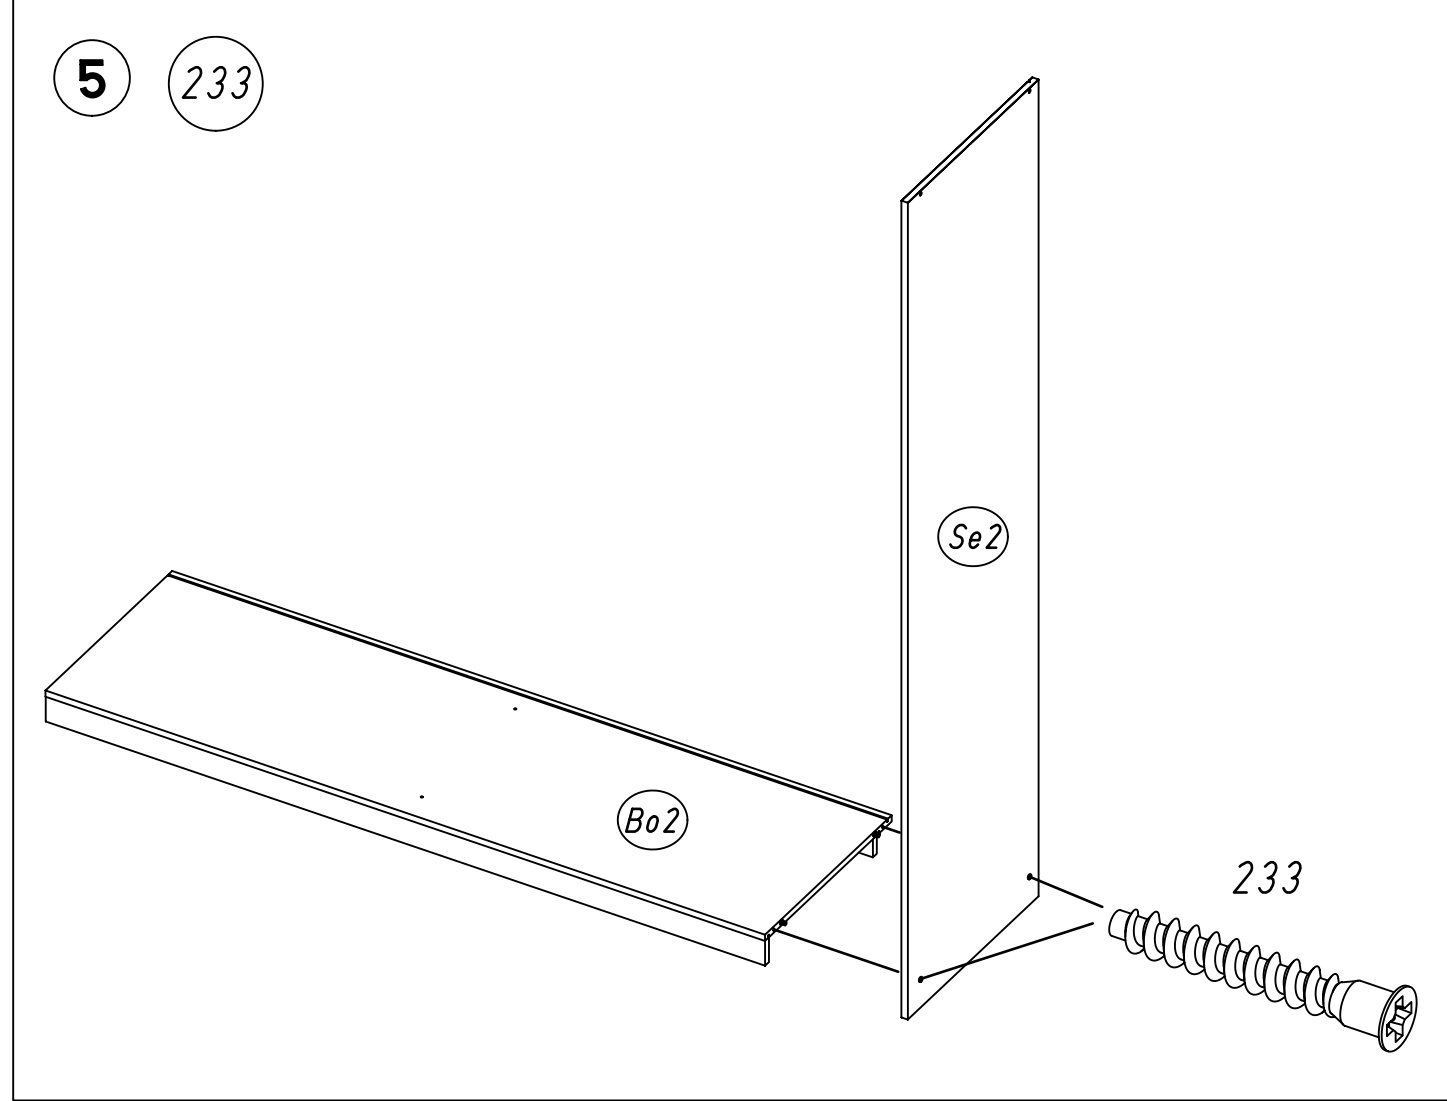

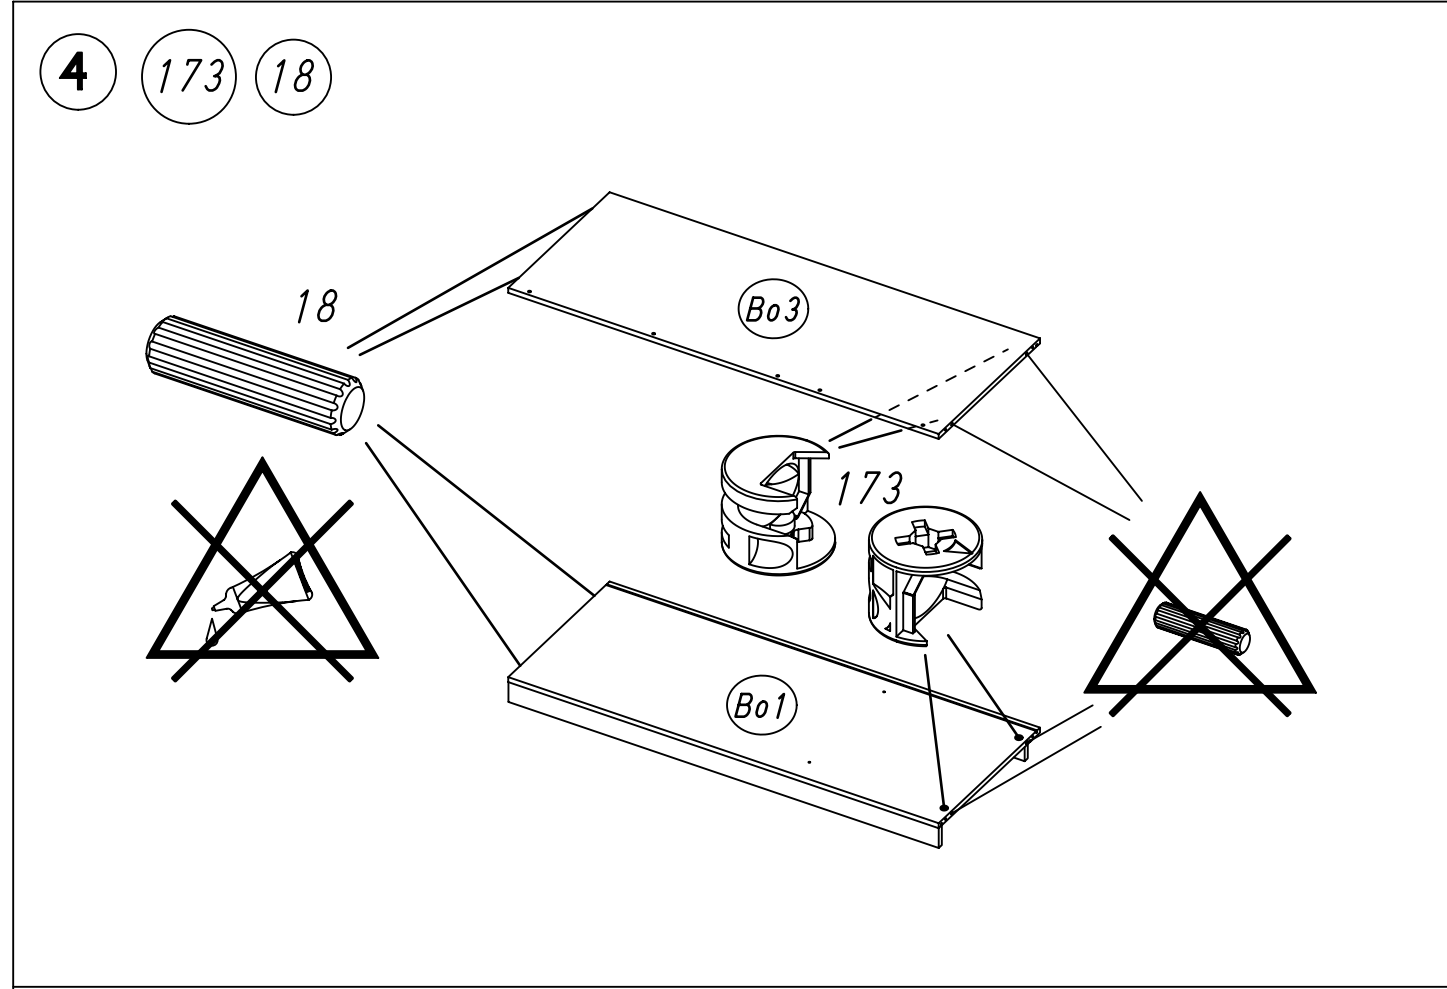

- Fs1**: A flat profile with a small circular feature.
- Fs2**: A flat profile with a small circular feature and a small rectangular feature.
- Ks1**: A cylindrical profile with a small circular feature.
- Ks2**: A cylindrical profile with a small circular feature.
- Gr**: A profile with a small circular feature.
- Pr**: A profile with a small circular feature.

1

This diagram illustrates the assembly of the base frame. It shows three main components: a long horizontal rail labeled *Bo1*, two vertical side rails labeled *So1* and *So3*, and a top rail labeled *11*. The process involves applying adhesive from tube *11* to the ends of the side rails (*So1* and *So3*) and the bottom rail (*Bo1*). A warning triangle indicates that the adhesive must be applied correctly. The final assembly shows the side rails being inserted into the ends of the bottom rail, secured by the top rail.
