RunningPad

THE WORLD'S MOST COMPACT TREADMILL

THE WORLD'S MOST COMPACT TREADMILL

# SPACE-SAVING SMART TECHNOLOGY

Bringing high-tech functionality to a compact footprint, the Dynamax RunningPad delivers smart technology that's even smarter on space.

DYNAMAX RUNNINGPAD

COMPACT DESIGN WITH AN INNOVATIVE  
FOLDING RUNNING DECK

NO ASSEMBLY REQUIRED, SIMPLY PLUG IN  
AND EXERCISE

Engineered with a unique foldable deck, the RunningPad's patented folding mechanism packs a complete treadmill into less than 0.5m<sup>2</sup>.

With the integrated transport wheels, the RunningPad can be easily moved around and stored anywhere in your home – in any corner or under your furniture. Simply fold and roll to store it away.

**SPEED RANGE FROM 1-9kph**  
**[0.6-5.6mph]**

Powered by an eco-efficient 1.0hp motor, the RunningPad can take you from a gentle walk to a challenging run, thanks to its 1-9kph speed range. Simply adjust the speed using the wireless remote control or use the unique adaptive speed control system to tailor your speed by moving closer to the front of the belt to increase your speed or dropping back to lower your speed.

Helping to support each stride, the RunningPad's low impact fibreboard and soft gel lined deck delivers on both cushioning and strength. The frames structure is composed of aluminium alloy to maximise its integrity, capacity and endurance. Aluminium alloy is incredibly strong and lightweight, which means the RunningPad can comfortably support a maximum user weight of 110kg. Its running area of 120 x 44cm is more than spacious enough for the tallest of users to experience an ideal home workout.

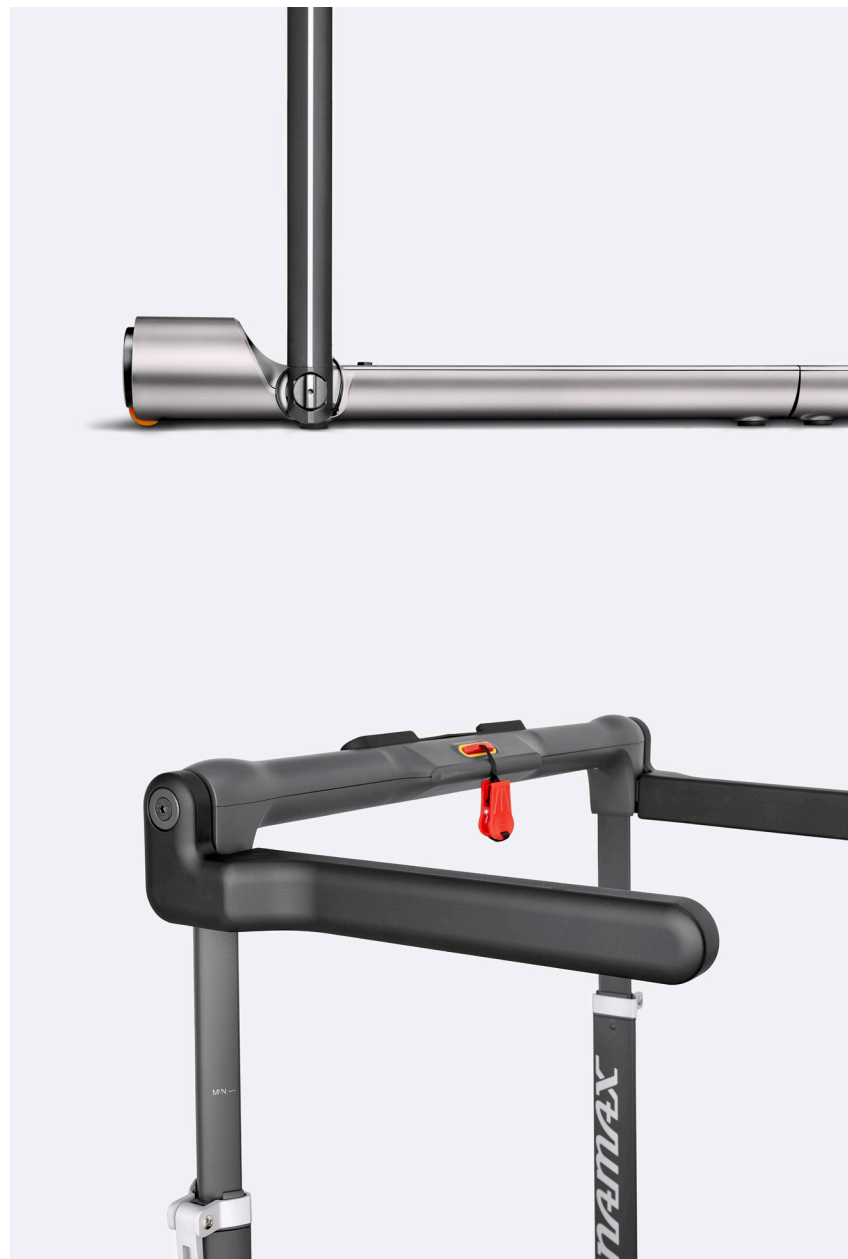

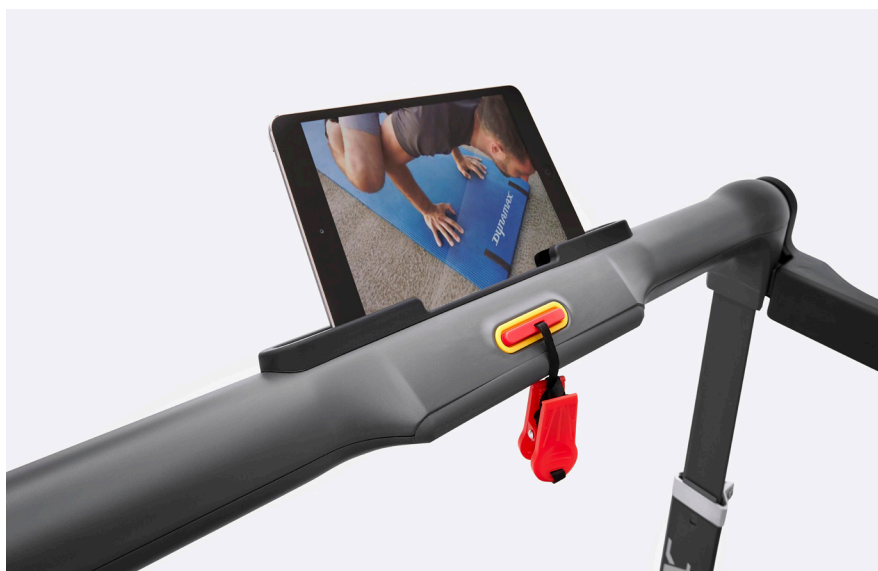

For an even better experience, simply download the companion app and sync the RunningPad to your smart device. You'll then be able to track and adjust each and every workout to help you meet your fitness goals. Providing live feedback through its Mirage LED Console, the RunningPad delivers time, distance and speed data with more detailed metrics streamed straight to your smart device.

The RunningPad's low profile design, which is just 5.7cm from the ground, minimises the step-up height and reduces the floor clearance, resulting in a quieter, safer experience. The hand grips and auto-stop safety key further enhance your safety when using the treadmill. A smart device holder is housed within the upright so you can easily watch your favourite movies or browse the internet while you exercise anywhere in your home.

- › 1.0hp eco-efficient motor
- › Speed from 1 - 9kph
- › Adaptive speed control system
- › Mirage LED console feedbacks speed, time and distance
- › Rubberised smart device holder
- › RunningPad app helps track and control your workout
- › Foldable deck with patented folding technology
- › Low impact fibreboard deck with soft gel cushioning
- › Aluminium alloy construction – lightweight and strong
- › Padded foam hand grips
- › Integrated transport wheels
- › No assembly required – unfold, plug-in and go
- › Wireless remote control included
- › Auto-stop safety function
- › Covers less than 0.5m<sup>2</sup> when folded
- › Setup dimensions: 150 [l] x 72 [w] x 90 [h] cm
- › Folded dimensions: 98 [l] x 72 [w] x 16 [h] cm
- › Running area: 120 [l] x 44 [w] cm
- › RunningPad weight: 38kg
- › Maximum user weight: 110kg
- › 2 year manufacturer warranty
