

SAMSUNG

Product Presentation

SSD 870 **EVO**

Confidential - for internal usage only
December, 2020

Introduction

SSD | In-house, seamless integration. For all our SSDs.

NAND

Samsung's latest V-NAND technology

DRAM

World's leading DRAM supplier for over 20 years

Firmware

In-house software algorithm for seamless connectivity and fast troubleshooting

Controller

In-house Samsung controller

Samsung SATA SSD: A decade of success

470/830/840 Series (2011/2012/2013)

- Market launch in Germany
- Brand awareness
- Performance standard
- Industry-wide, leading reliability
- PRO: Unrivaled performance for professional users
- EVO: World premiere of an SSD with 3-bit MLC NAND flash

850 Series (2014)

- Bestselling SSD in the world
- PRO: World premiere of an SSD with V-NAND flash
- EVO: World premiere of an SSD with V-NAND flash and 3-bit MLC

860 Series (2018)

- Fourth generation V-NAND technology
- Highest performance and TBW specification in the 2.5" SATA segment

860 QVO (2019)

- One of the first SATA SSDs with 4-bit MLC NAND flash

870 QVO (2020)

- First SATA SSD with up to 8TB on the consumer market
- Affordable high capacity SSD to reach a broader target audience

870 EVO (2021)

- Samsung's latest model of the world's best-selling SSD series
- Best in-class SATA performance
- New MXK controller

From 2013:

- 1 TB capacity
- RAPID mode/TurboWrite

860 EVO Market Feedback

860 EVO has received overwhelmingly positive feedback from customers and tech media in regards to performance and quality of the product.

Amazon.de Customer Reviews

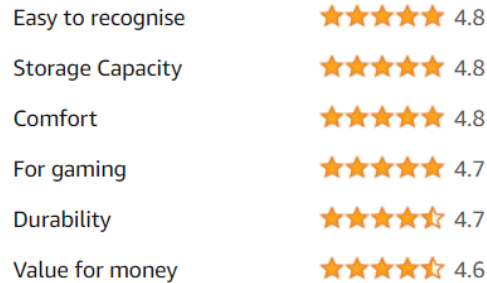

Customer reviews

★★★★★ 4.9 out of 5

42,647 global ratings

By feature

"Loading times are about 30% less with the 860 EVO SSD. Copying and starting data is also much faster. Definitely worth for every gamer. The installation is very easy. Samsung SSDs have never disappointed me before."

"The 860 Evo SSD drive is super fast and the price is fully justified. I wanted to discard my 6 years old laptop but after I installed the SSD the laptop is as fast as never before!"

Tech Media Reviews

"The 860 EVO has received five stars from all readers in the core disciplines of writing and reading speed, noise level and processing - which means that there is no room for improvement!"

"The SATA SSD 860 EVO from Samsung stores and reads data with a top speed. The price is quite attractive for a new SSD of this size and performance."

Awards from left to right:

Computer Testsieger sehr gut (1,3), 01/2020, zu SSD 860 EVO 1TB; im Test | CHIP: Sehr gut (1,0), 02/2020, zu SSD 860 EVO 2TB; No license purchased - must not be used | CHIP: Sehr gut (1,1), 09/2020, zu SSD 860 EVO 4TB; im Test; No license purchased - must not be used! |

870 EVO in a nutshell

Excellence in Performance

Maximum SATA interface sequential speeds of 560/530 MB/s, improved random speed & sustainable performance

The World's favorite SSD

The latest model in the world's best-selling SSD series

New packaging

870 EVO comes in a new package design. With the vertical look, it appears nice and sleek.

Attractive pricing

870 EVO comes at the same price level as 860 EVO

SSD 870 EVO – Value Proposition

870 EVO

870 EVO is the Samsung's latest model of the world's best-selling SSD series, with the latest V-NAND technology and the new MKX controller. 870 EVO proves why the EVO series has been the **favorite choice** among general users by showing the **best in-class performance, committed reliability** and **convenient usage** with a variety of features

Best In-Class Performance

Committed Reliability

Convenient Usage

SSD 870 EVO – Focus USPs

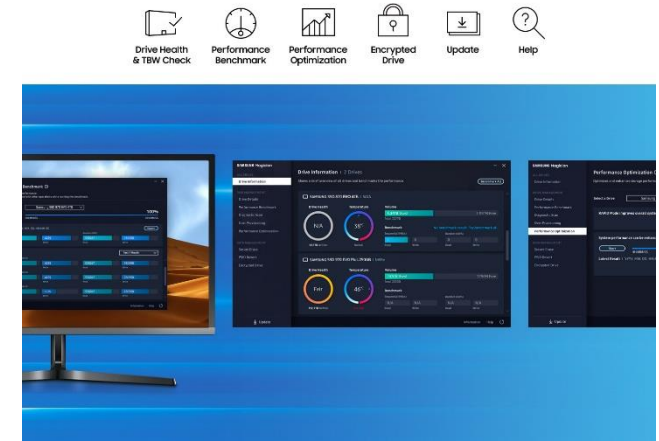

Best In-Class Performance

Committed Reliability

Convenient Usage

- 860 EVO performance reaches the limits in the SATA interface.
 - Sequential Read/Write (560/530 MB/s)
 - Random Read/Write (98/88 KIOPS)

- Up to 2,400 TBW guaranteed endurance.
- Sustained random write performance has increased up to 30%, allowing the 870 EVO to provide better performance consistently.

- Thanks to the low devslp power consumption of 870 EVO, the latest modern standby feature is available, allowing users to experience instantaneous interaction.
- Powerful software for easy upgrade and SSD management. (Samsung Data Migration 4, Magician 6)

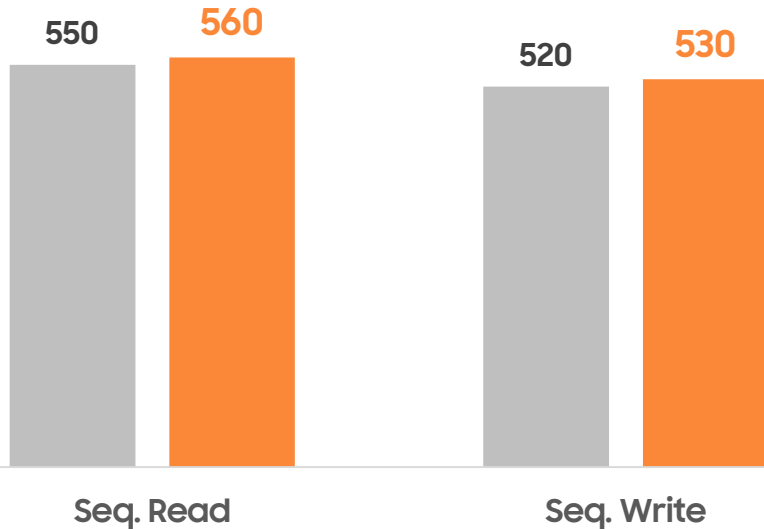

SSD 870 EVO – Best In-Class Performance

The 870 EVO provides **best in class performance** as sequential read (up to 560 MB/s) and write (up to 530 MB/s) approaches the limits of performance available with the SATA interface. These improvements are accompanied by enhanced random performance, bringing **up to 38% higher speeds** than 860 EVO in low queue depth workloads (QD1) which makes it an **ideal solution for everyday computing experiences**.

Sequential Performance

(Unit: MB/s)

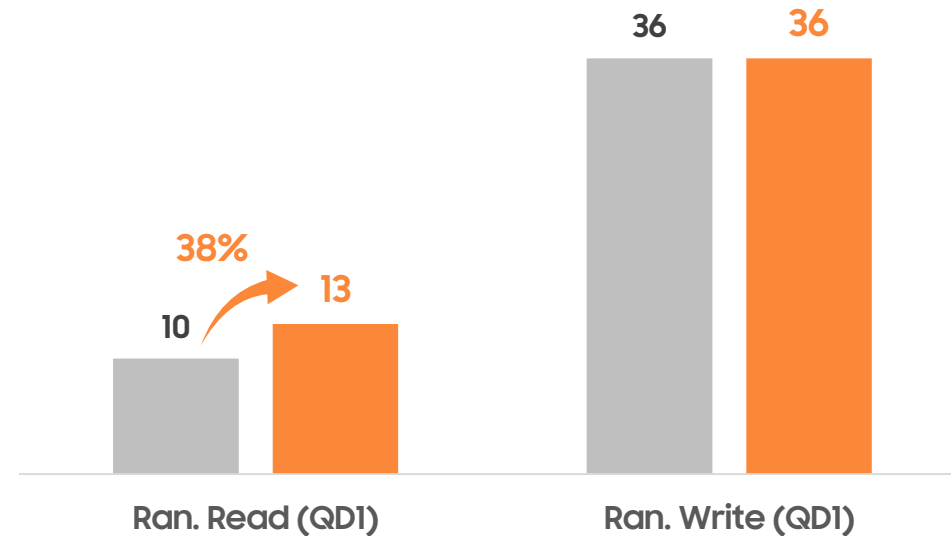

■ 860 EVO ■ 870 EVO

Random Performance

(Unit: K IOPS)

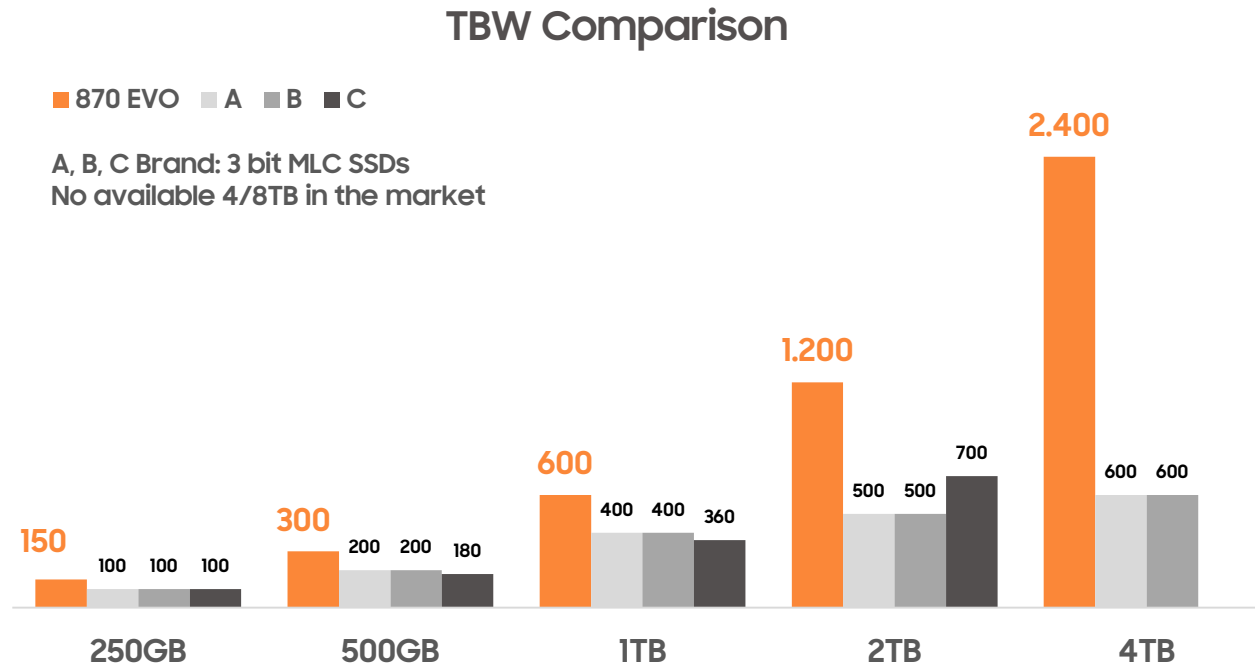

■ 860 QVO ■ 870 QVO

Performance measured on Windows 10 system

SSD 870 EVO – Committed Reliability – Guaranteed Endurance

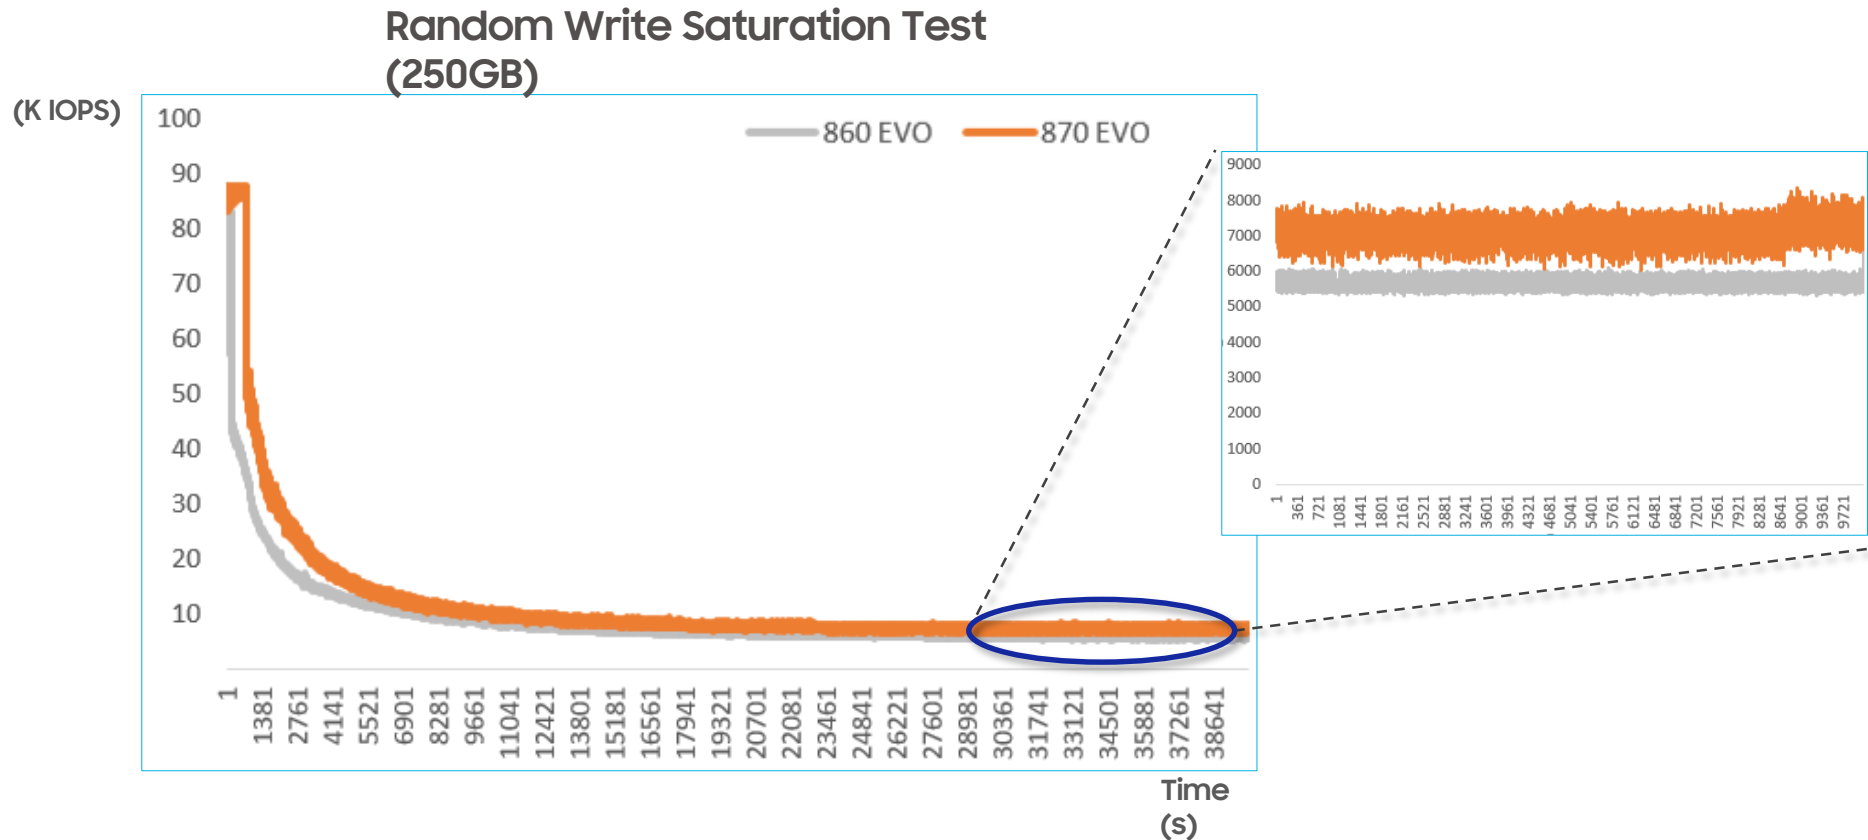

870 EVO provides an **industry leading** amount of up to **2,400 TBW**, which is sufficient enough for daily use. 870 EVO guarantees both the endurance and the performance within TBW and comes along with a **5-year limited warranty**.

* All documented endurance test results are obtained in compliance with JESD218 Standards. Please visit www.jedec.org for detailed information on JESD218 Standards

SSD 870 EVO - Committed Reliability - Sustained Performance

Sustained random write performance has **increased up to 30%***, allowing the 870 EVO to provide better performance consistently.

* For 250 GB model | Performance measured on Windows 10 system

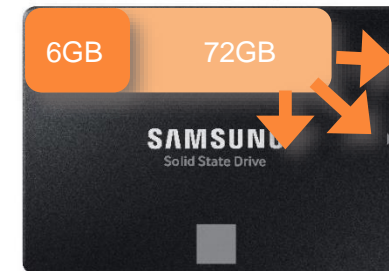

SSD 870 EVO – Intelligent TurboWrite Technology

870 EVO provides Intelligent TurboWrite to **improve the user experience**. Intelligent TurboWrite **accelerates write speeds** and maintains **long-term high performance** by using a pre-allocated SLC buffer.

Capacity	Total Region	Default Region	Intelligent Region
250GB	12GB	3GB	9GB
500GB	22GB	4GB	18GB
1TB	42GB	6GB	36GB
2TB	78GB	6GB	72GB
4TB	78GB	6GB	72GB

Light workload

Heavy workload

870 EVO allocates up to 78GB Intelligent TurboWrite region

SSD 870 EVO – Convenient Usage – Modern Standby

Thanks to the low device sleep power (under 5mW) of 870 EVO, the latest modern standby feature is available, allowing users to **experience instantaneous interaction** similar to that of smartphones.

Modern Standby User Experience (Win 8 & 10, SATA 3.2 interface)

① **Instant On/Off** user experience between sleep and active mode

② **Background activity in sleep mode** with low power consumption (Stay up-to-date)

* System Requirement for modern standby : <5mW power for device, <100ms exit latency, OS ver Win 8 or higher, SATA 3.2 interface

* 870 EVO 250GB to 2TB models support modern standby

* Introduction for Modern Standby(Microsoft) : <https://docs.microsoft.com/en-us/windows-hardware/design/device-experiences/modern-standby>

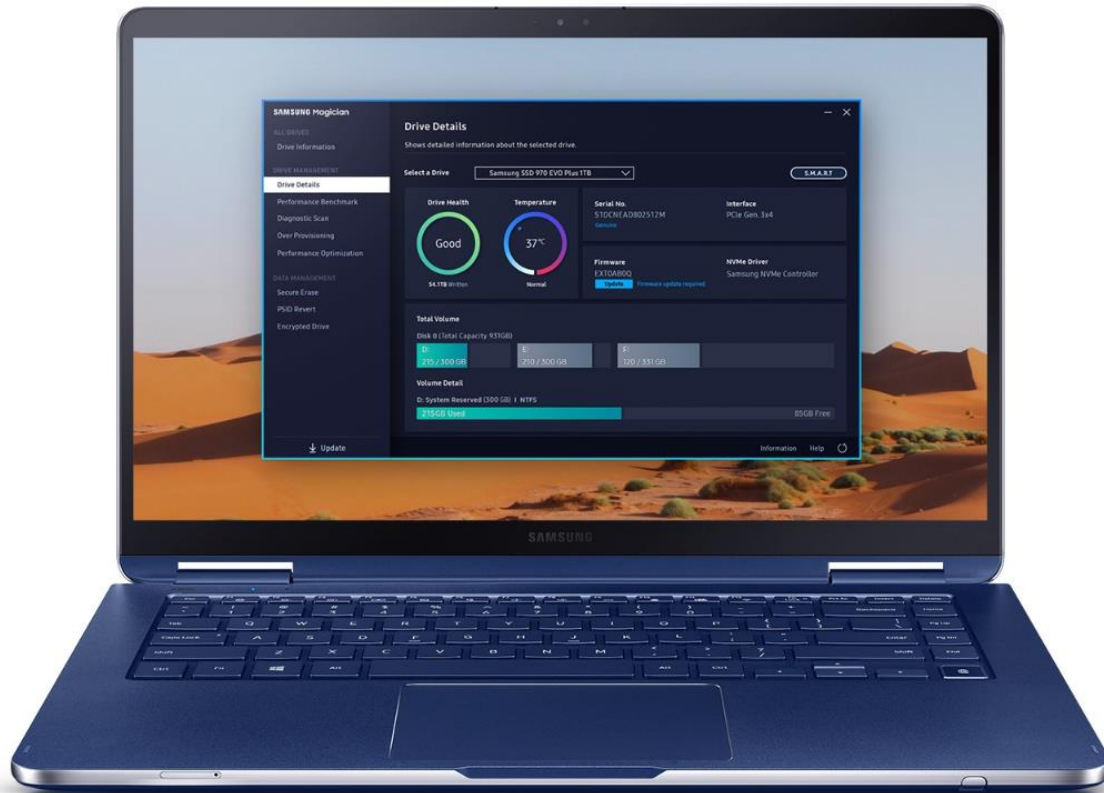

SSD 870 EVO – Package Details

Package Design is changed to a **vertical look** for better visibility on retail shelves.

Samsung Magician 6.1 & Data Migration 4.0

Renewed with a unified design, Magician 6.1 & Data Migration 4.0 provides **powerful features & convenient upgrade experience** to Samsung SSD users.

Samsung Magician 6.

Magician 6 was **wholly renewed** with a new intuitive user experience and support for new features – Diagnostic Scan, PSID Revert.

Main Features

Drive Health Check

Get an instant diagnosis of your drive, including Total Bytes Written, to assess the overall health of your SSD.

Performance Benchmark

Inspect your SSD's sequential and random read/write speed, and compare the scores with past results.

Performance Optimization

Restore the performance of the SSD from degradation by TRIM and achieve faster performance through RAPID Mode.

New Features

PSID Revert

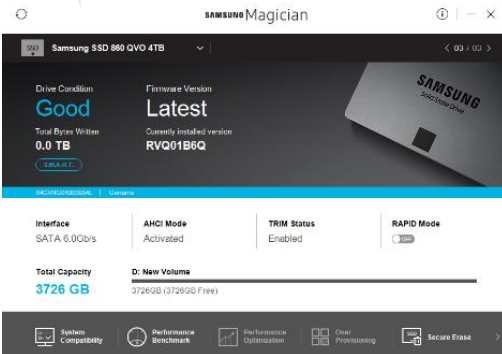

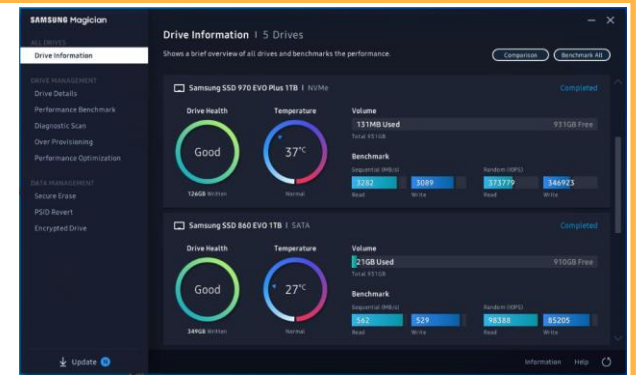

Unlock and reset your drive to its factory setting by entering the 32-character PSID password printed on the drive label.

Diagnostic Scan

Identify and fix potential problems with partial or full scans to maintain your drive's capabilities.

UX Changes

Magician 6

Magician 5
