This diagram illustrates the final assembly steps for a cabinet unit, specifically the installation of doors and drawers. The main assembly view shows the cabinet with three doors (13, 14, 15) and two drawers (16, 17) being attached. The doors are shown with handles and are being aligned with the cabinet frame. The drawers are shown being inserted into the cabinet's internal structure. A detailed inset shows the installation of a drawer front (70) onto a drawer box (70) using a screw. Another detailed inset shows the installation of a door hinge (155) onto a door (158) using a screwdriver. The diagram includes numbered callouts for each part and step.

1. Install the hinge (155) onto the door (158) using a screwdriver.

2. Install the door (158) onto the cabinet frame using a screwdriver.

Parts shown: 13, 14, 15, 16, 17, 70, 155, 158.

11

Diagram 11 illustrates the installation of the door handle. The diagram shows three steps:

- Mounting the handle body (B) to the door edge (D) using screws (C).
- Mounting the handle body (B) to the door edge (D) using screws (C).
- Mounting the handle body (B) to the door edge (D) using screws (C).

The diagram also shows the handle body (B) being mounted to the door edge (D) using screws (C).
